

PT4128-MK ProULV ULV-Misting Treatment System

Features

- ULV-MIST Hand Gun has a single trigger controlling both Liquid and Air Outputs which shuts both off simultaneously. Noise from other continuously running equipment is reduced with the ProULV, providing a quiet working environment
- Needle Control Valve on the Tank provides ultra low output volumes for precise application and chemical savings. Open the valve slightly and complete large space areas quickly
- Coiled Hose reaches from 6 to 16 Feet and has Brass Quick Disconnects for easy servicing
- 128 oz - 3.78 Liter Tank is durable High Density, translucent see through plastic
- Complete System is Cart mounted and uses a 120 Volt AC Air Compressor for continuous and quiet operation
- A 50 Foot Yellow Air allows the ProULV to be removed from the Mobile Cart to enter into attics or other hard to service areas.
- The ProULV is all about durability and uses Stainless Steel, Brass, Aluminum and high quality Hose components
