

KNOWING BETTER

Why ProFoam Platinum? Remember the countless times you almost hit the target when treating for pests--ants, drain flies, spiders, but once sprayed, the liquid ran in the other direction, or couldn't reach the nest because the equipment simply couldn't *carry the product into the target zone?*

DOING BETTER

ProFoam Platinum a *biodegradable foam formulation*-designed to reduce water, time and money, allowing companies successful treatments -responsibly leaving a safer chemical footprint. Water usage is a global concern-conservation of this precious commodity is everyone's concern. Mixed correctly-ProFoam Platinum decreases water usage - anywhere from 4 to 18 times less.

ProFoam is a thick non-ionic, substantial foam that plays well with all *insecticides, biocides and even some fertilizers.* Pro-Foam stacks up like nothing else, *traveling immediately into cracks, crevices, under concrete slabs, wall voids, vertical and horizontal surfaces*-- all places that are known harbourages for pests. When mixed according to the directions on the label and on the insecticide label, **ProFoam** gets to the target where liquid treatments can not go.

THE SCIENCE BEHIND THE LABEL

ProFoam Platinum is a non-toxic blend of surfactants and adjuvants. Use it to complete "Green Treatments" in conjunction with NPD's other "Green" products; **BIOPlus** and **Vital Oxide** and increase their reach and effectiveness. *ProFoam Platinum has not been formulated using any compounds listed in the current California Prop 65 Bill.*

THE LABEL

ProFoam Platinum, an industry standard has been independently tested by major chemical manufactures and was found to "play well with others" as it is **compatible and non-repellent.** Foam is listed on their labels as a recommended treatment procedure.

When mixing **ProFoam Platinum** to other chemicals follow all mixing instructions on chemical manufacturer's label, adding Pro-Foam Platinum as directed. ProFoam Platinum rates will vary depending on chemical and equipment used.

ProFoam Platinum Foaming Agent affectively delivers your chemical of choice, *penetrating deep into areas and covers surfaces.* **ProFoam Platinum** goes the distance to supply the highest quality performance with low environmental impact. **ProFoam Platinum** can be used everywhere: **Pest Control, Sanitation, Construction, Manufacturing, Turf Industry, Food Processing, Automotive, Poultry and Horticulture.**
